

Re. Manuscript **tc-2021-41**

Dear Dr Andrews and co-authors,

Thank you for your thorough response to the reviews and the substantially improved manuscript. The experiments are very clearly presented and the results easy to understand. I am now delighted to accept the manuscript for publication, subject to two minor amendments:

1. Can you change the acronym GIS for GrIS?
2. L272: The Gulley ref misspells the authors name (Gully vs. Gulley)

I would like to commend you for the easy availability of your code which really helped the review process.

Thank you for your patience with the review and editorial progress, I am so pleased that the manuscript can now be recommended for publication.

Best regards,

Liz

Dr Liz Bagshaw, Editor
