

Dear Editor,

We are very glad to receive your email. Thank you for your recognition of this article and your help all the time. In view of the two minor technical revisions you proposed, we have made corresponding modifications in the revised manuscript. Please see below our response (text in red) to the comments point by point.

Thank you for your help!

Best regards,

The authors

### **Technical revisions**

1. Please do indeed move the links to the technical descriptions into the references, and just cite them properly, e.g. as: (Manufacturer, Year)

**Responses:** Thanks for your advice. **In lines 99–104 of the revised manuscript**, we modified the format of the citations and added technical descriptions to the references.

2. Please change SEE and SWW to ESE and WSW, I think that is the more appropriate abbreviation if I understand correctly what you mean?

**Responses:** Thanks for your advice. In the revised draft, we have changed SEE and SWW to ESE and WSW.
