Addendum to authors' response to reviewers (second round) for TC 2022-172, "Reversible ice sheet thinning in the Amundsen Sea Embayment during the Late Holocene."

Mar 15, 2023

NOTE: We have not supplied a complete latexdiff comparison of previous and revised versions of the main text, because there are only three minor technical corrections in the main text. These are tabulated in the first section of the 'Authors' response.'
